EDUCATION CONSULTING

Capability Statement

www.mcgee3educationconsulting.com

McGee3 Education Consulting LLC specializes in evaluations for educational programming, training, or student support services in both K-12 and higher education. Our areas of expertise include STEM education, Career and Technical Education (CTE), and rural education. We approach each project with an eye towards using data-driven decision making to provide clarity around program outcomes.

Our Approach

Collaboration & Engagement

- Trust is a non-negotiable. We believe that engagement is essential to creating transparency and enhancing two-way feedback in real time.

Evaluation for Continuous Improvement

- Educational programming is context dependent. We focus our efforts on understanding your context and utilizing multiple methods to investigate program context, inputs, process and products.

Integrity in Reporting

- You need information you can use. Providing clear and focused results is a priority in our work. We work with our partners and clients on reporting methods that meet their needs.

Dissemination

- Celebrate your success. So many program evaluations with amazing results are never shared broadly. Dissemination can enhance the sustainability of your programming.

Clientele

What Makes Us Different?

- We're a woman-owned, small business serving the southeastern US.
- We have experience you can trust, serving programs of all sizes and multiple funding agencies.
